

A brief guide to using the ChoralMusic Tutor (CMT)

- V.01 by John Craick (ITFactotum) on 12/5/25

Key features of CMT include ..

1. There is a play/pause control, a rewind button and buttons to skip 1 bar forward and back
2. Use the slider or type in the box to set the starting bar number
3. You can reduce (or increase) the playback speed as needed (!!!)
4. You can adjust the individual track volumes and/or set your own track to be emphasized, solo or mute.
5. (See below) Using the repeat tab you can set any range of bar nos to be cyclically repeated. (while you desperately try to learn the bloody thing.)

Using the repeat tab

1. Switch on Repeat mode
2. Set the first bar with the the slider or typing a number in the box
3. Set the last bar similarly
4. Set the delay between repeats with the slider or typing in the box
5. Go back to the Play tab and press Play, Pause etc. as needed.
